This is a poorly optimised and buggy game. The gunplay is terrible and kills the framerate so it's best to avoid combat. Unfortunately this gives you nothing to do but run aimlessly through the environment. Check it out in my first impressions video.

I said aimlessly because the game doesn't give you any direction or even a basic mini map. In a game with fast zombies and ropey gunplay you might want to add some decent melee mechanics too. Just some kind of objective would be nice, because like the zombies in the game, this is brainless, pointless and empty.. Horrible and laggy, avoid like the plague.. So to start this off the price is worth the game no doubt but the game is pretty buggy and some things recommend looking into would be the animations and the zombies reach because when you are running even if they are super far behind they can still hit so the hit box for the player should be changed a lot. But overall great work!. Sorry all, but this game is not worth playing, even if it were free. Non-intuitive control scheme and objectives, poor combat, terrible zombie AI - so frustrating. Oddly enough the stealth and stealth kills seem to work fine!. I got this game on Steam Summer Sale and I thought it was a good deal for the price, but it wasn't. The game is extremely laggy to where I could barely complete it. Also the achievement system is bad because I completed the right requirements for an achievement and it wouldn't give it to me. This game needs to have more stuff to do in it because all you do is walk around and kill zombies. Even for the low price I don't recommend the game.. tl;dr version 2/10 it's bad, and not a good bad.

Yeah it's a no from me. I finished the game in under an 80 minutes, and about 20 minutes of that was getting my youtube stream set up. I could of finished it quicker if I had any clue where the "escape zone" was, like in 5-10 minutes I reckon. 2 zombie types, regardless of weapon they all take 2 shots to the head to kill and only difference between them is models. Just feels like a typical Unity asset flip kind of game.

Sure the game is cheap and nothing wrong with that. But still. It would not of been hard to add in some more content and gameplay. Game feels empty.

It's glitchy as heck with entire sections of scenery vanishing.

If the dev had just added some more zombie types, NPC's a few basic side quests it would of made a huge difference.

There's no map so you're basically wandering around aimlessly.

ALL the guns are basically the same in terms of handling and power.

I don't expect a game this cheap to be mind blowing. I don't expect perfect visuals and gameplay. But it does have to be FUN, and sadly this game is just NOT fun. I own plenty of dollar games that are the good kind of bad. The Orion Dino games for example show what a single person can do if they put a little effort in. And it's not like this is Corpix Games first game.

Dev, if you're gonna make game like these, you need to put more effort into it. If you're not a coder, then at least grab some paid assets from the Unity Store and add more life to your game. Even some animals and dumb NPC's running around being zombie bait would of been something. Please also add volume options in the game menu. By default the audio is LOUD and even when I lowered it using windows volume controls the music came out blaring in my stream.

And rebrand everything. It's pretty obvious this game was at some point going to be called Zombie Island.

Anyways check out the video of me playing it and see for yourself. Me? Imma getting a refund.

Good, fun and rather satisfying. This game does have a few bugs but for the price you cant really complain. I would recommend this to someone who likes zombie games. It doesnt take long to complete, just follow the road to freedom.. The game is utter bullcrap, it costs around 77c in summer sale but works like a steam greenlight failure smh.
